REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The closest prior art of record, does not teach, suggest or disclose a mat for use with a sterilization container comprising a pattern of ridges extending from a lower surface of the ma in a manner such that no fold line can traverse the mat from one side to the other without intersecting at least one ridge, wherein the pattern of ridges further comprises a discontinuous first set of ridges, which creates an aperture therein, that does not intersect a second ridge of the first set of ridges; and a second set of discontinuous ridges, which creates a second aperture that allows fluid to flow from the first and second apertures, that does not intersect with a second ridge of the second set of ridges, wherein the first set of ridges are positioned perpendicular to the second set of ridges and a first ridge from the first set intersects with a first ridge from the second set of ridges.
3. As disclosed in the Office Action filed on October 15, 2008, Frieze (U.S. Patent No. 5,766,561) discloses a sterilization container system comprising an enclosure with an interior volume and a flexible mat having a downwardly facing surface with a pattern of ridges extending from the downwardly facing surface. Frieze continues to disclose that the pattern of ridges comprises a first and second set of ridges with first and second apertures created to allow fluid to flow between said first and second apertures. Frieze does not disclose that the pattern is provided in a manner such that no fold line can traverse the mat from the first side to the second side without intersecting at least one ridges, or that the first and second ridges are perpendicular and placed in a manner so

Art Unit: 1797

that a first ridge of the first set of ridges intersects with at least the first ridge of the second set of ridges.

4. Adam (U.S. Patent No. 5,815,995) discloses a flexible elastomeric mat having a downwardly facing surface comprising a pattern of ridges extending from the downwardly facing surface in a manner such that no fold line can traverse the mat from one side to the other without intersecting at least one ridge. The reference continues to disclose that the pattern of ridges comprises a first and second set of ridges that are positioned perpendicular to one another and intersect one another. The reference does not disclose; that the mat is for use with a sterilization container; that the first ridge of the first and second set of ridges does not intersect with a second ridge of the first and second set of ridges; or that the first set of ridges is discontinuous to create a first aperture, or that the second set of ridges is discontinuous to create a second aperture that is in fluid communication with the first aperture.

5. As such, the closest prior art of record, namely Frieze (U.S. Patent No. 5,766,561) and Adam (U.S. Patent No. 5,815,995) do not teach, suggest or disclose a mat for use with a sterilization container comprising a pattern or ridges on a lower surface of said mat such that no fold line can traverse the mat from the first side to the second side without intersecting at least one ridge, wherein the pattern of ridges further comprises a discontinuous first set of ridges, which creates an aperture therein, that does not intersect a second ridge of the first set of ridges; and a second set of discontinuous ridges, which creates a second aperture that allows fluid to flow from the first and second apertures, that does not intersect with a second ridge of the second set

Art Unit: 1797

of ridges, wherein the first set of ridges are positioned perpendicular to the second set of ridges and a first ridge from the first set intersects with a first ridge from the second set of ridges. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
